1. Game Description

Fill The Water Bucket is a HTML5 side scroller platform game. Attractive game levels and much more are waiting for you to discover. Satisfaction guaranteed if you play this game.

- HTML5 game playable on all platforms (PC, Mobile, Android, iOS).
- Ultra HD graphics (you can easily reskin according to your design).
- Made in Construct 3.

a) Game Engine

Construct 3 is the best game engine for creating 2D games, browser games and mobile games.

Official site: <https://www.construct.net/en>

Official manual:

<https://www.construct.net/en/make-games/manuals/construct-3>

b) Admob ADS

In this game, you can install a code for advertising from AdMob with your advertising identifiers, if you need help with installation, then write to me by e-mail (Paid service).

For further info, please refer to:

<https://www.construct.net/en/makegames/manuals/construct-3/plugin-reference/mobile-advert>

c) Change Graphics

The game contains the objects' sprite sheets that you can edit if you want to change objects' Images.

Objects' dimensions will be arranged according to the canvas size for the best display on Devices.

If you want to change objects' graphics, replace the sprite sheets with your own, ensuring the frames to be arranged properly as in the game.

d) Change Backgrounds

The game contains the background sprite sheet that you can edit if you want to change graphic.

If you want to change background graphic, replace the spritesheet with your own, ensuring the frames to be arranged properly as in the game.

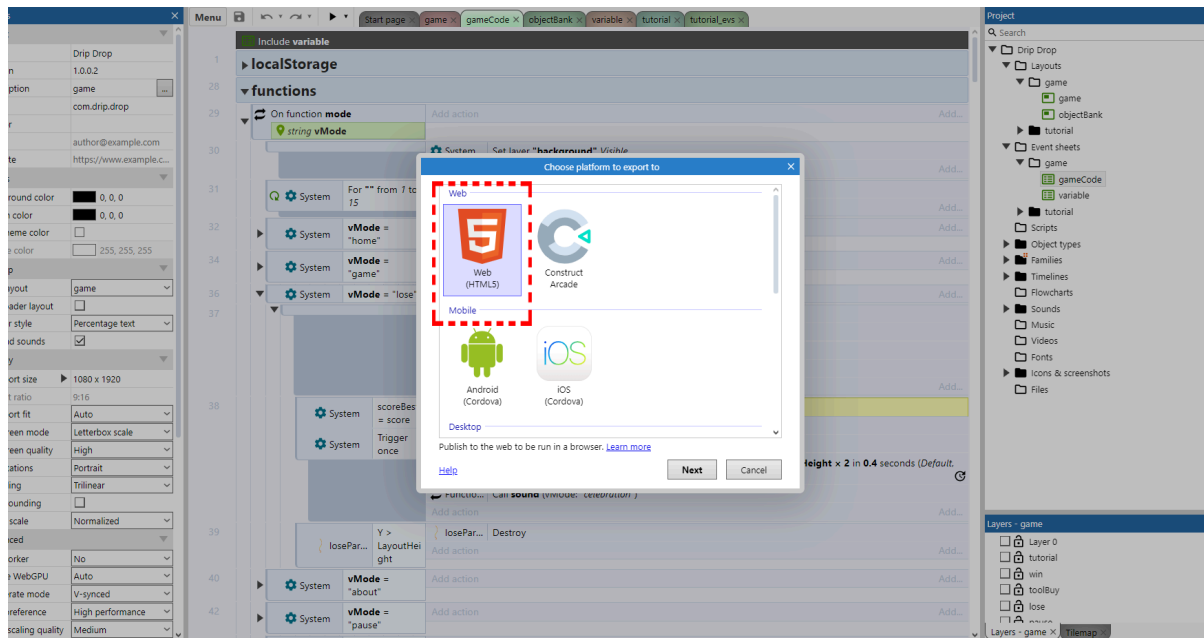

e) Additional plugins / behaviours used in this game

The game does not contain any non-native plugins / behaviours that need to be installed before use.

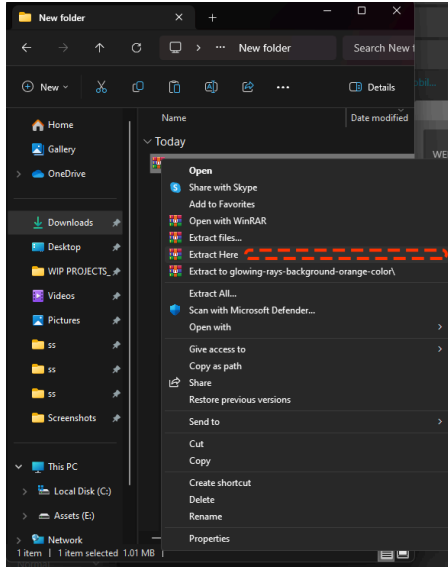

2. Hosting on your website

You need hosting to upload it and share the link with your friend or audience to play.

Step 1: From the Construct 3 window, click on the "Menu" button then select "Export" or press F6. Then select "Web".

Step 2: After the file has been downloaded, extract it.

Finally, you can import the previously extracted files to your server link and it would be ready to be published on your website.

2. Construct File (.c3p)

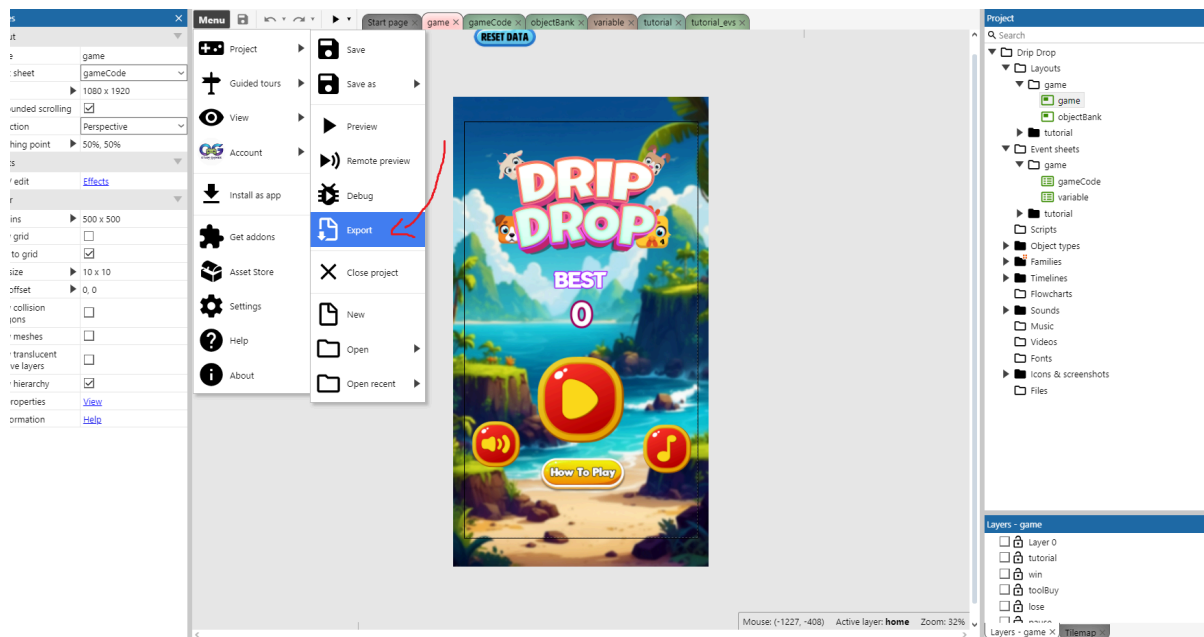

Construct 3 file (.c3p) includes all sources and game mechanics. You can go to the editor. <https://editor.construct.net/>

In order to export your game, you are required to get a Construct 3 license. You can get the license. <https://www.construct.net/en/make-games/buy-construct>

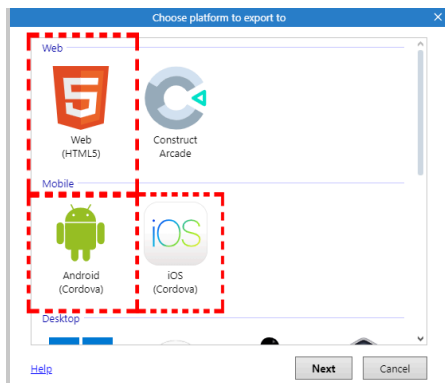

3. Exporting the Game

Step 1. Open the .c3p on editor.

Step 2. Go to Menu -> Project -> Export

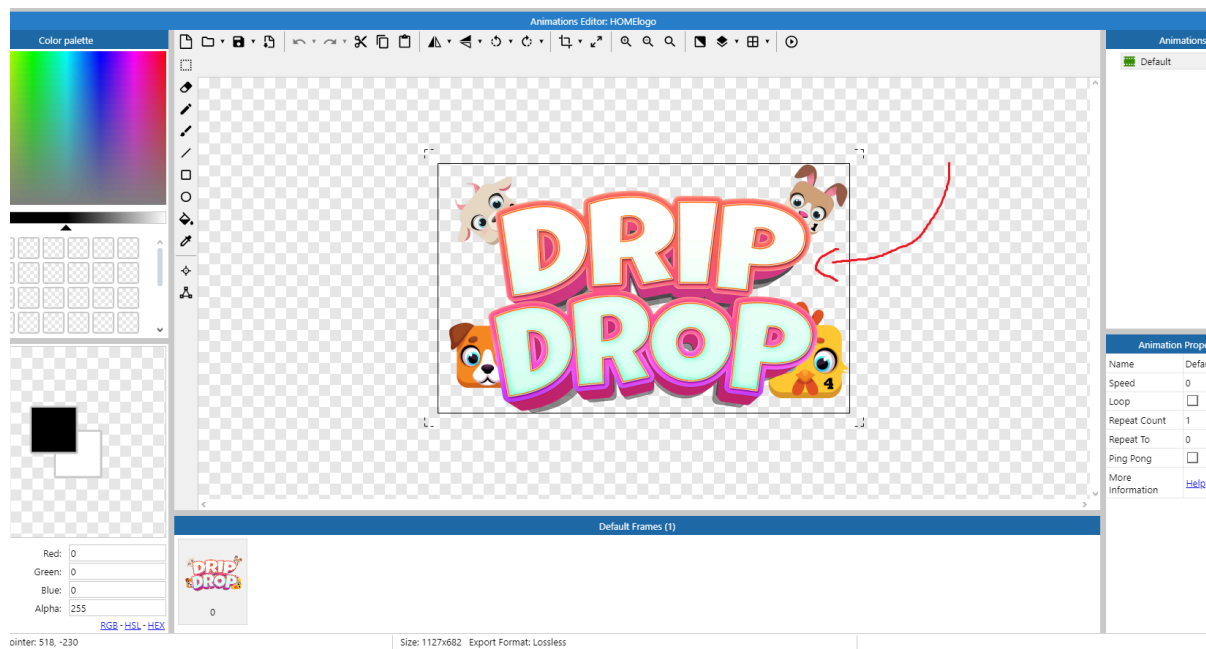

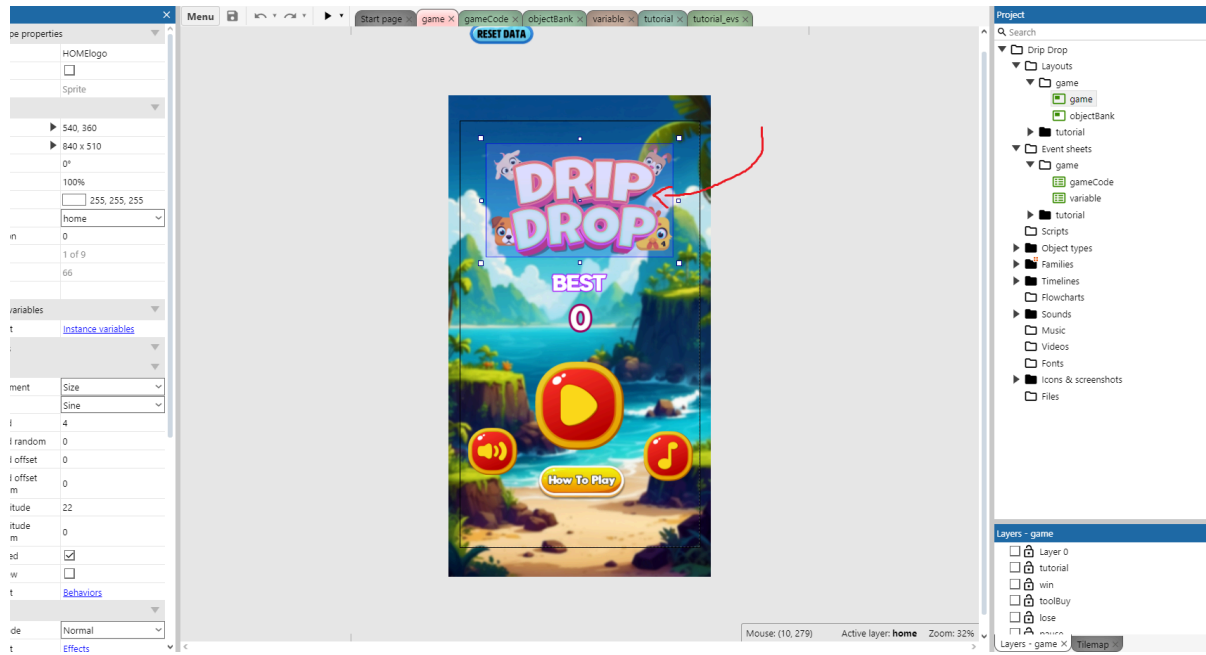

Step 3: Choose Android(Cordova), iOS(Cordova) or Web(HTML5) according to which platform you want to export to.

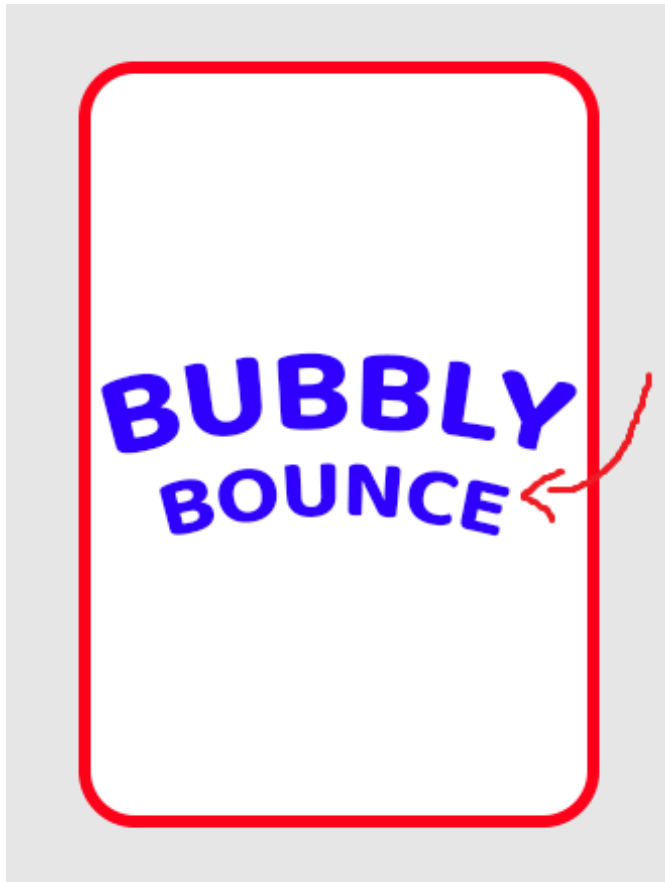

4. Replacing Graphics

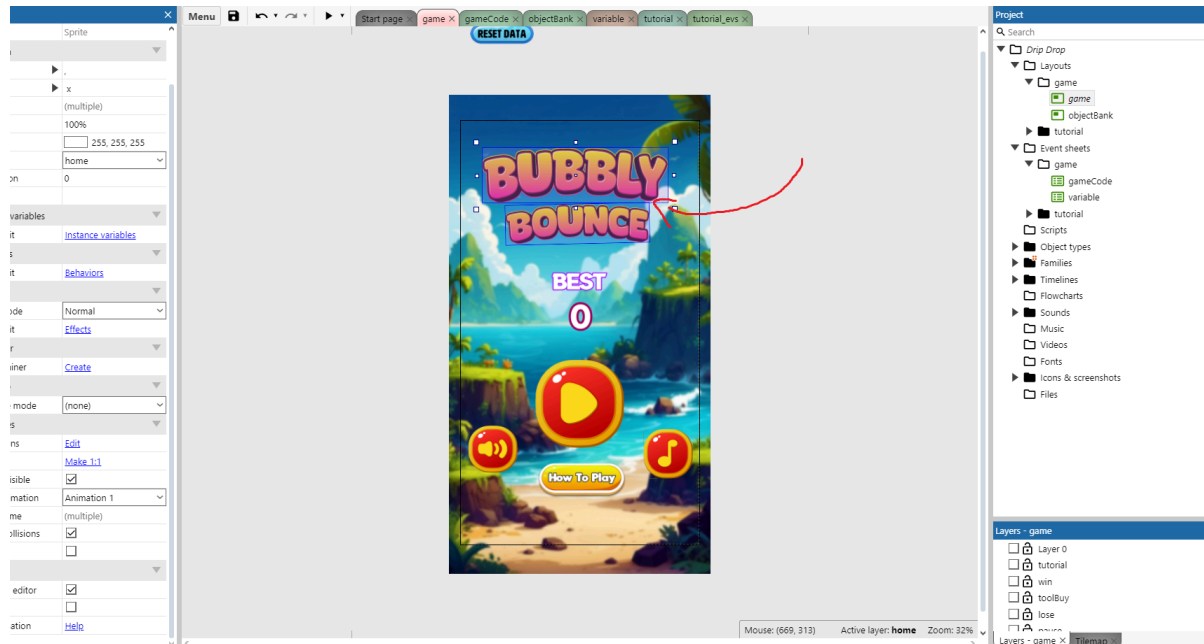

- First, you open the .c3p file and determine the object to change the graphics.

Then follow the instructions below:

- Select the image to replace it with the present image in your project.

5. Embed HTML5 Game in Wordpress Plugin

Using the Game Uploader plugin, you can easily embed your HTML5 game into your WordPress post, page, or widget. Embedded HTML5 Game can make your HTML5 game fit on any screen size.

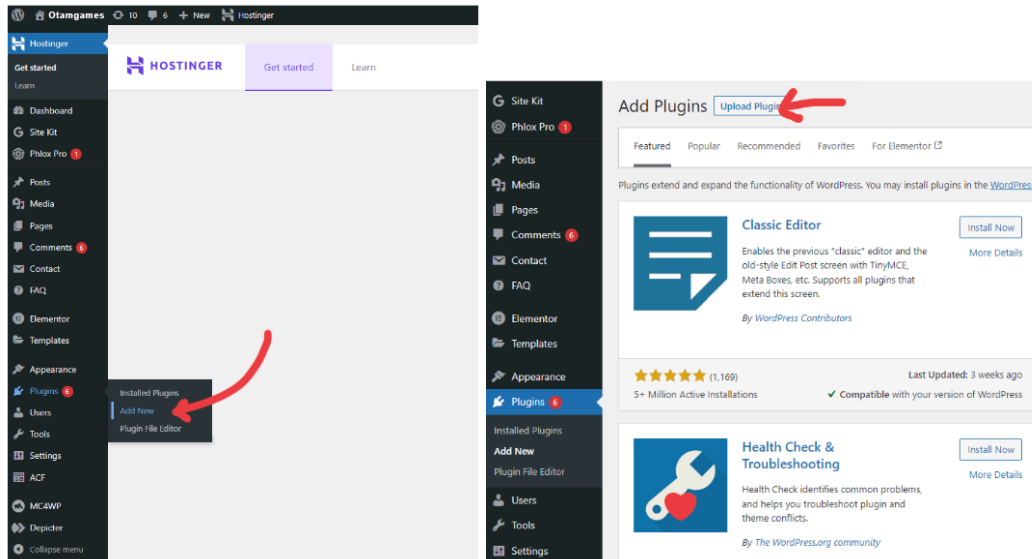

Shortcode output is based on iframe, so your embedded content will be supported on any modern browser.

Installation:

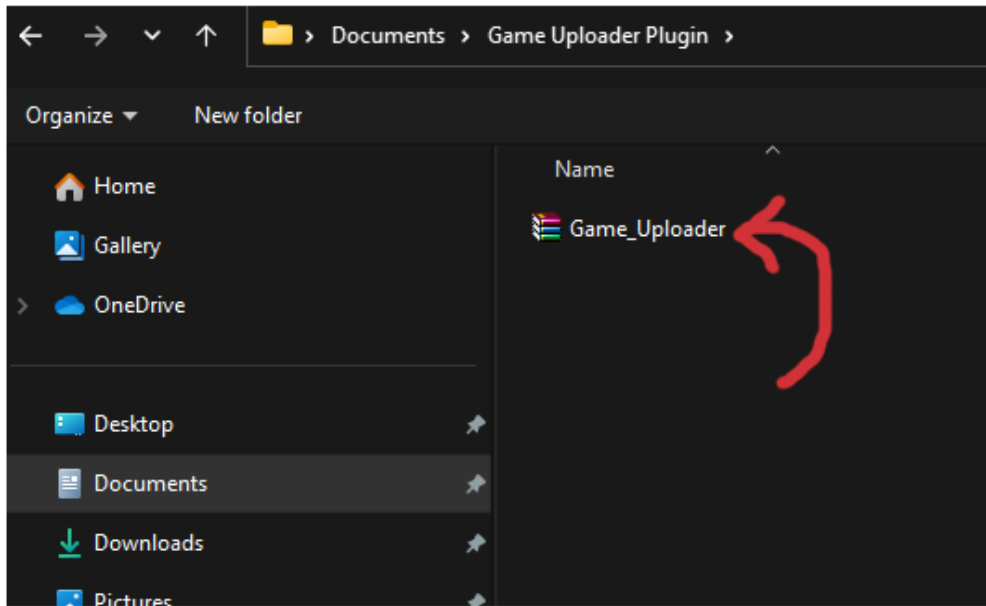

- Download the plugin from this link

<https://drive.google.com/file/d/1kxLfrib4BMnuJqZIHBiYb1PPwLP8VNuG/view?usp=sharing>

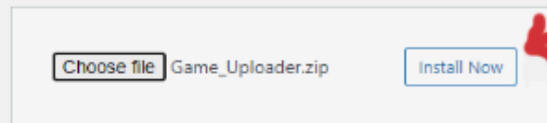

- Login to your WordPress site, then go to “Dashboard > Plugins > Add new > Upload plugin.”

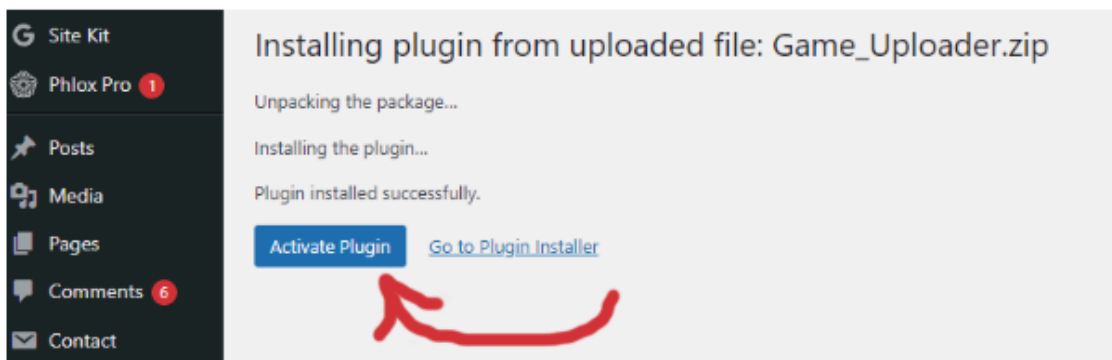

- Upload “game_uploader.zip” downloaded from our link.

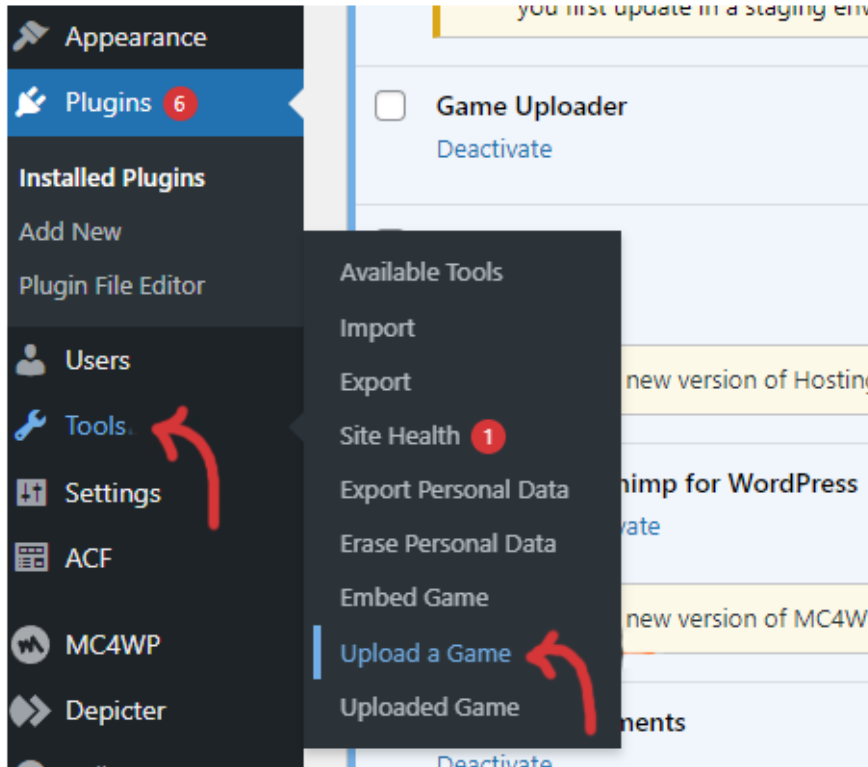

If you have a plugin in a .zip format, you may install or update it by uploading it here.

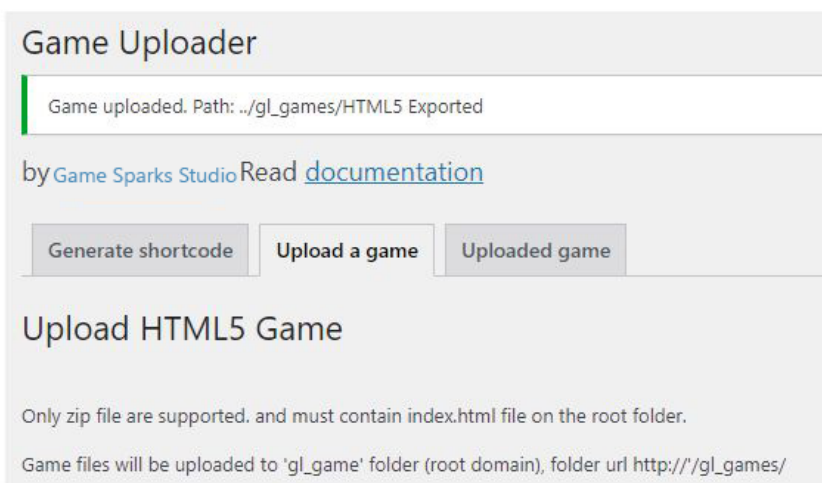

- After the plugin is uploaded then, activate it.

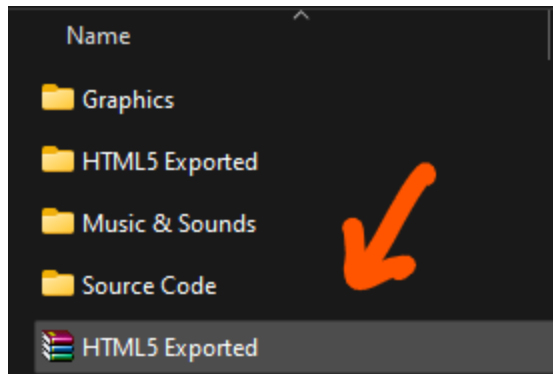

- Then go to Tools, Upload a Game.

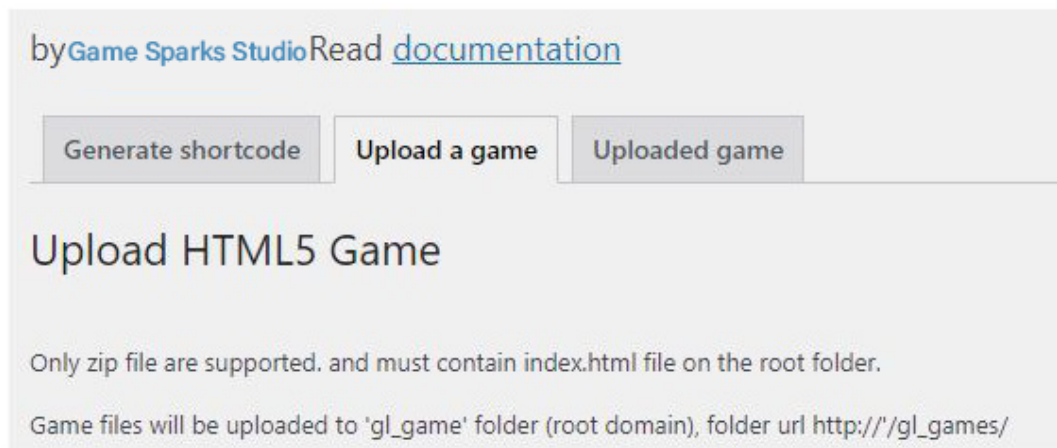

- Choose the “HTML5 exported.zip” file downloaded from the codecanyon. Then click Upload Game

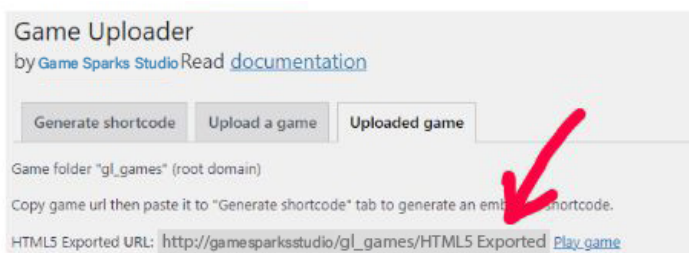

- It will show the path where game is uploaded after the successful upload.

- After that go to Uploaded Game section then copy the uploaded path.

- Then go to Embed Game section from Tools, Paste the link in the url section.
Then generate the shortcode. (Set the size as per your Game)

Generate shortcode Upload a game Uploaded game

By using Game Uploader, you can embed your HTML5 game, video, etc. on your WordPress post, page or widget easily. Game Uploader can make your HTML5 game or video fit on any screen size. Generate your shortcode bellow and put to your post, page, widget, etc. shortcode output based on iframe, so, your embedded content will be support on any modern browser.
